Rifle drilled ports in both horizontal braces reduces weight to ensure playing response

PHAETON[®] TRUMPETS

This revolutionary trumpet designed by famed Las Vegas performer, David Perrico, is a horn to rival all others. The conical bore of .460" at the receiver, increasing to .470" at the valve section, gives this trumpet superior response, power and ease of playing. The Brush Brass finish gives this horn an "eye catching" look. Complete with a custom Gold Plated Perrico mouthpiece and a hand rubbed saddle brown all leather gig bag, this model has it all.

SPECIFICATIONS

Weight: 2.5 lbs/1.13kg

Bore: Conical .460"-.470"/11.68- 11.94 mm

Bell: 1 pc Yellow Brass 4.88"/124mm
w/soldered bell wire ring

Receiver: Heavy Brass Solid Stock

Pistons: Monel w/rose brass ports and
brass springs

Water Keys: 2-Amado style

Slides: Reverse tuning, outside tubes
brass/inside tubes nickel silver

Trim: Extra Heavy Brass Finger
Buttons, Top & Bottom Caps

LAS VEGAS[™]

PHT-LV-1200

"LAS VEGAS" MODEL DESIGNED BY FAMED TRUMPET
ARTIST, DAVID PERRICO, IN BRUSHED BRASS FINISH

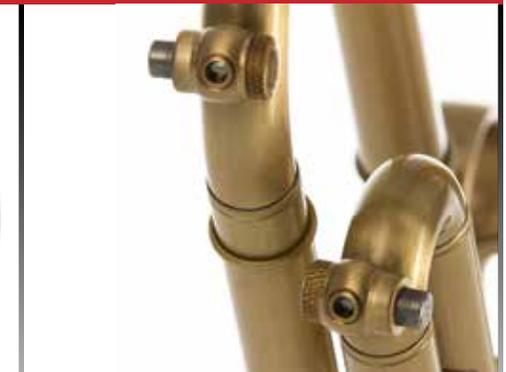

Custom Gold Plated "Perrico" mouthpiece designed by Las Vegas Artist David Perrico. This mouthpiece is a perfect match for our PHT-LV-1200 with its shallow cup, wide rim and rapid taper shank, it guarantees a focused sound in all registers

Heavy duty finger rings

The rounded tuning slide on the PHT-LV-1200 is designed to reduce resistance, enhance air flow and assure perfect "slotting"

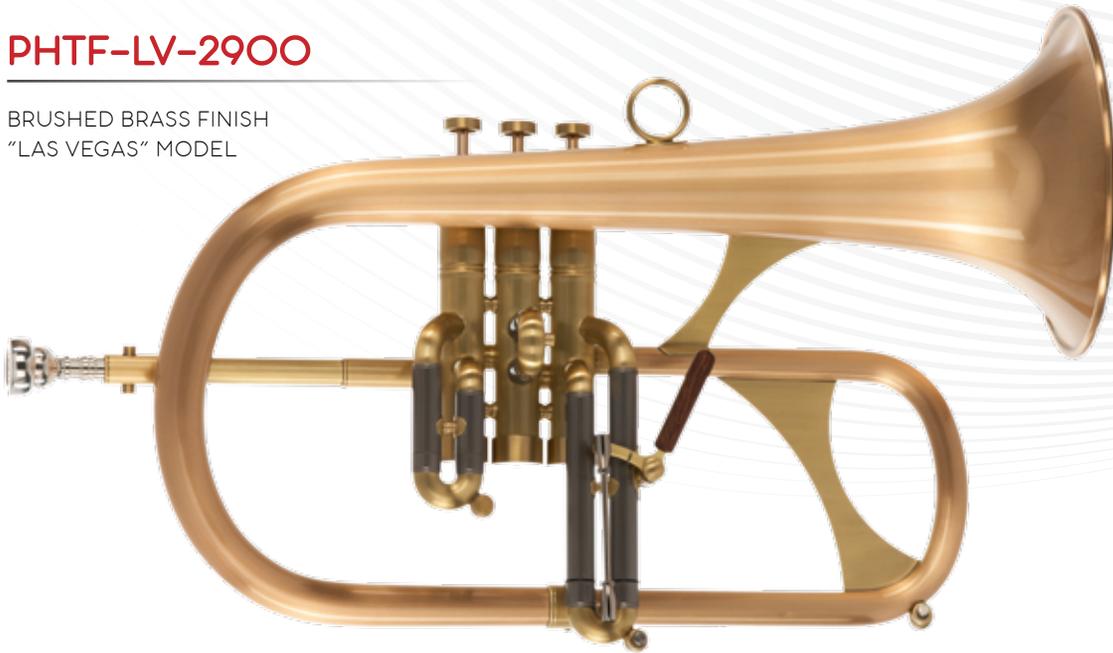

Amado style water keys

The PHTF-LV-2900 Las Vegas flugelhorn complements our revolutionary Las Vegas trumpet. From the Rose Brass bell, medium large bore, carved wood 3rd valve trigger handle, heavy duty finger ring, short stroke Monel pistons, heavy solid brass machined finger buttons and all leather gig bag, this flugelhorn is complete from top to bottom. Beautiful tone, engineered for responsiveness and outstanding looks make this a horn that all others will envy.

"LAS VEGAS" MODEL

LAS VEGAS™

SPECIFICATIONS

- Weight: 3 lbs/1.36 kg
- Bore: .434"/11.02mm
- Bell: 1 pc Rose Brass 6.02"/153mm
- Receiver: Tunable
- Pistons: Monel w/Brass Springs
- Water Keys: 3-Amado style
- Slides: Reverse tuning, outside tubes brass/inside tubes nickel silver
- Trigger: 3rd Valve w/Walnut Inlay Handle
- Trim: Extra Heavy Brass Finger Buttons, Top & Bottom Caps

Balancing a Phaeton Flugelhorn is effortless with our heavy duty ring strategically positioned to reduce arm/hand fatigue

Enclosed brass upper springs and metal piston guides assure speed and resistance free action

Third slide trigger with Walnut inlay handle

PHAETON[®] POCKET TRUMPETS

Phaeton Pocket Trumpets are virtual clones of our great full size trumpets. Same short stroke pistons, same bell construction, same bore size, same trim components and same case style. These trumpets have the best "tight wrap" design available on the market. This instrument is designed for players who are looking for that special/unique brilliant sound produced only by pocket trumpets. These horns are ideal for small Jazz and Dixie combos when that distinctive "Pocket" sound is most desirable.

PHTP-3000

LAS VEGAS HORNS COME WITH HAND RUBBED ALL "SADDLE" LEATHER BAGS

Quality

Setting The Highest Standard for Trumpets

“The trumpet is the instrument of the gods,” said master musician Marcus Belgrave in a recent interview. Now, if these gods happened to descend from the heavens in an ornate spaceship, with all the trimmings out of a sci-fi movie and brought a horn in its likeness, they might have given us the PHAETON line up of innovative trumpets and flugelhorns.

Available in 6 stunning finishes: traditional gold lacquer, brushed brass, black chrome onyx, matte black, bright silver plate and antique black/copper there is a look to please everyone. With their wide swooping braces and thick valve caps, these horns are designed to look like a heavy horn, but actually play and feel much

lighter. Similar to a heavier horn, you get a nice, full resonant vibration when you push the volume and airflow. There is exceptional intonation from the low “D” below the staff to the “A” above the staff. These horns produce a sound described as full bodied and elegant.

Exceptional intonation, crisp resonance, ideal balance and focused projection are examples of the visionary thinking from the engineers who collaborated to make these horns a reality. When you couple these features with our “short stroke” piston design, you have a horn that rivals all others on the market.

Make the bold step and start playing a Phaeton horn today!
